Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claims 8-11,14-15,28-30,34-36,and 39-40 are pending.

Response to Arguments

The Applicant's arguments filed on July 20, 2006 have been fully considered.

The amended claims are rejected in reconsideration of O'toole, Jr. et al. (US Patent 6,279,112) in view of Daly et al (US Patent 5,878,141) and further in view of Archibald et al (US Patent 5,825,883).

See following rejection.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 14, 15 and 39 are rejected under 35 U.S.C. 103(a) as being unpatentable over O'toole, Jr. et al. (US Patent 6,279,112) in view of Daly et al (US Patent 5,878,141) and further in view of Archibald et al (US Patent 5,825,883).

As per claim 14,

O'toole, Jr. et al. ('112) discloses a method for transmitting content data over a computer network comprising

providing a first interface to a publisher to define content data objects;
providing a second interface to a user of a client computer to select content data objects from the publisher;(Figure 2)

providing a third interface to the publisher and the user of the client computer to select payment terms and conditions for the transmission of content data objects from the publisher to the user(Figure 4A);

providing a switching network to transmit content data objects from the publisher to the user upon request from the user;(Figure 4B)

wherein the network comprises an embedded system coupling the publisher to the user computer (Column 3, lines 10-20)

The examiner notes that the mere automation of a process does not render patentability.

O'toole, Jr. et al. ('112) does not explicitly disclose managing a billing process for causing transfer of payment from the user to the publisher in exchange for transmission of

Art Unit: 3621

requested content data objects, Daly et al, discloses managing a billing process for causing transfer of payment from the user to the publisher in exchange for transmission of requested content data objects (Figure 6); it would have been obvious to a person of ordinary skill in the art at the time of the invention to combine the O'toole, Jr. et al. With the Daly et al method in order to allow the merchant to realize a profit from the transaction.

O'toole, Jr. et al. ('112) does not explicitly disclose wherein the content data objects are processed for transmission according to a type of client computing device operated by the user to access the data objects, Archibald et al ('883), discloses wherein the content data objects are processed for transmission according to a type of client computing device operated by the user to access the data objects (Figure 1, column 3, lines 56-67); it would have been obvious to a person of ordinary skill in the art at the time of the invention to combine the O'toole, Jr. et al. With the Archibald et al ('883) method in order to allow the merchant to realize a profit from the transaction.

Claims 15 and 39 are in parallel with claim 14 and are rejected for at least the same reasons.

Allowable Subject Matter

Claims 8-11, 28-30, 34-36 and 40 are allowable over the prior art record.

Conclusion

Examiners note: Examiner has cited particular columns and line numbers in the references as applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings of the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant in preparing responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.
